Jobs Report:

Revised November and Preliminary December job figures released

INDIANAPOLIS, Ind. – Today the Indiana Department of Workforce Development released revised November and preliminary December 2004 **payroll employment figures** for the state.

Compiled in conjunction with the U.S. Bureau of Labor Statistics, payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers. The survey is taken each month during the week of the 12th.

Looking at revised **November** figures, the state's *seasonally adjusted* numbers indicate that 2,913,500 jobs existed in the month, while there were 2,947,500 total jobs when looking at the revised *non-seasonally adjusted* figures.

In the same report, preliminary data for the month of **December** was also released. The state's preliminary *seasonally adjusted* payroll employment was 2,913,200 jobs for the month. The figure marks a loss of 300 jobs when compared to November (revised), but a net increase of 15,100 jobs when compared to December 2003. The state's preliminary *non-seasonally adjusted* figure estimated that 2,943,900 jobs existed in December, 3,600 fewer than existed in November and 15,500 more than existed in December 2003.

At the same time, the nation's preliminary *seasonally adjusted* payroll employment figure grew by 157,000 jobs in December to reach 132.3 million jobs. The country's preliminary *non-seasonally adjusted* payroll employment figure for December totaled 133 million jobs, down from October's 132.2 million job mark.

Seasonally adjusted figures:

In December, Indiana reported 2,913,200 total jobs. The number is down 300 jobs from November's (revised) 2,913,500 job number and up a total of 15,100 net jobs when compared to December 2003's mark.

Looking at December's preliminary *seasonally adjusted* numbers by **industry super-sector**, Indiana's goods-producing sector reported employment of 731,500 in December, up 7,300 from the previous year. Of that figure, the construction sector saw employment grow by 6,100 net new jobs over the year to reach 153,800 jobs. At the same time, the manufacturing sector reported 570,700 total jobs, 1,800 more jobs than existed in November and 1,400 more when compared to December 2003.

Through its various programs and initiatives, the Indiana Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with the state's 27 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and closures, and operates a statewide job placement service.

For more information on Indiana's labor market, contact the Indiana Department of Workforce Development at 1-888-WorkOne, or visit the web site at www.workforce.IN.gov.

Technical Notes:

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12th of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For most accurate analysis, please use revised data sets and not preliminary estimates
